About me:

I am a Programming and Database graduate with a strong passion for front-end development and UI/UX design. My expertise includes working with Firebase, HTML, CSS, and Bootstrap, as well as designing user-friendly interfaces using Figma

Skills & Technologies

Frontend Development: HTML, CSS,
Bootstrap

UI/UX Design: Figma, Prototyping,
Wireframing

Backend Integration: Firebase
Authentication & Database

Projects:

1- Virtual Space Website:

Designed and developed an interactive website about space.

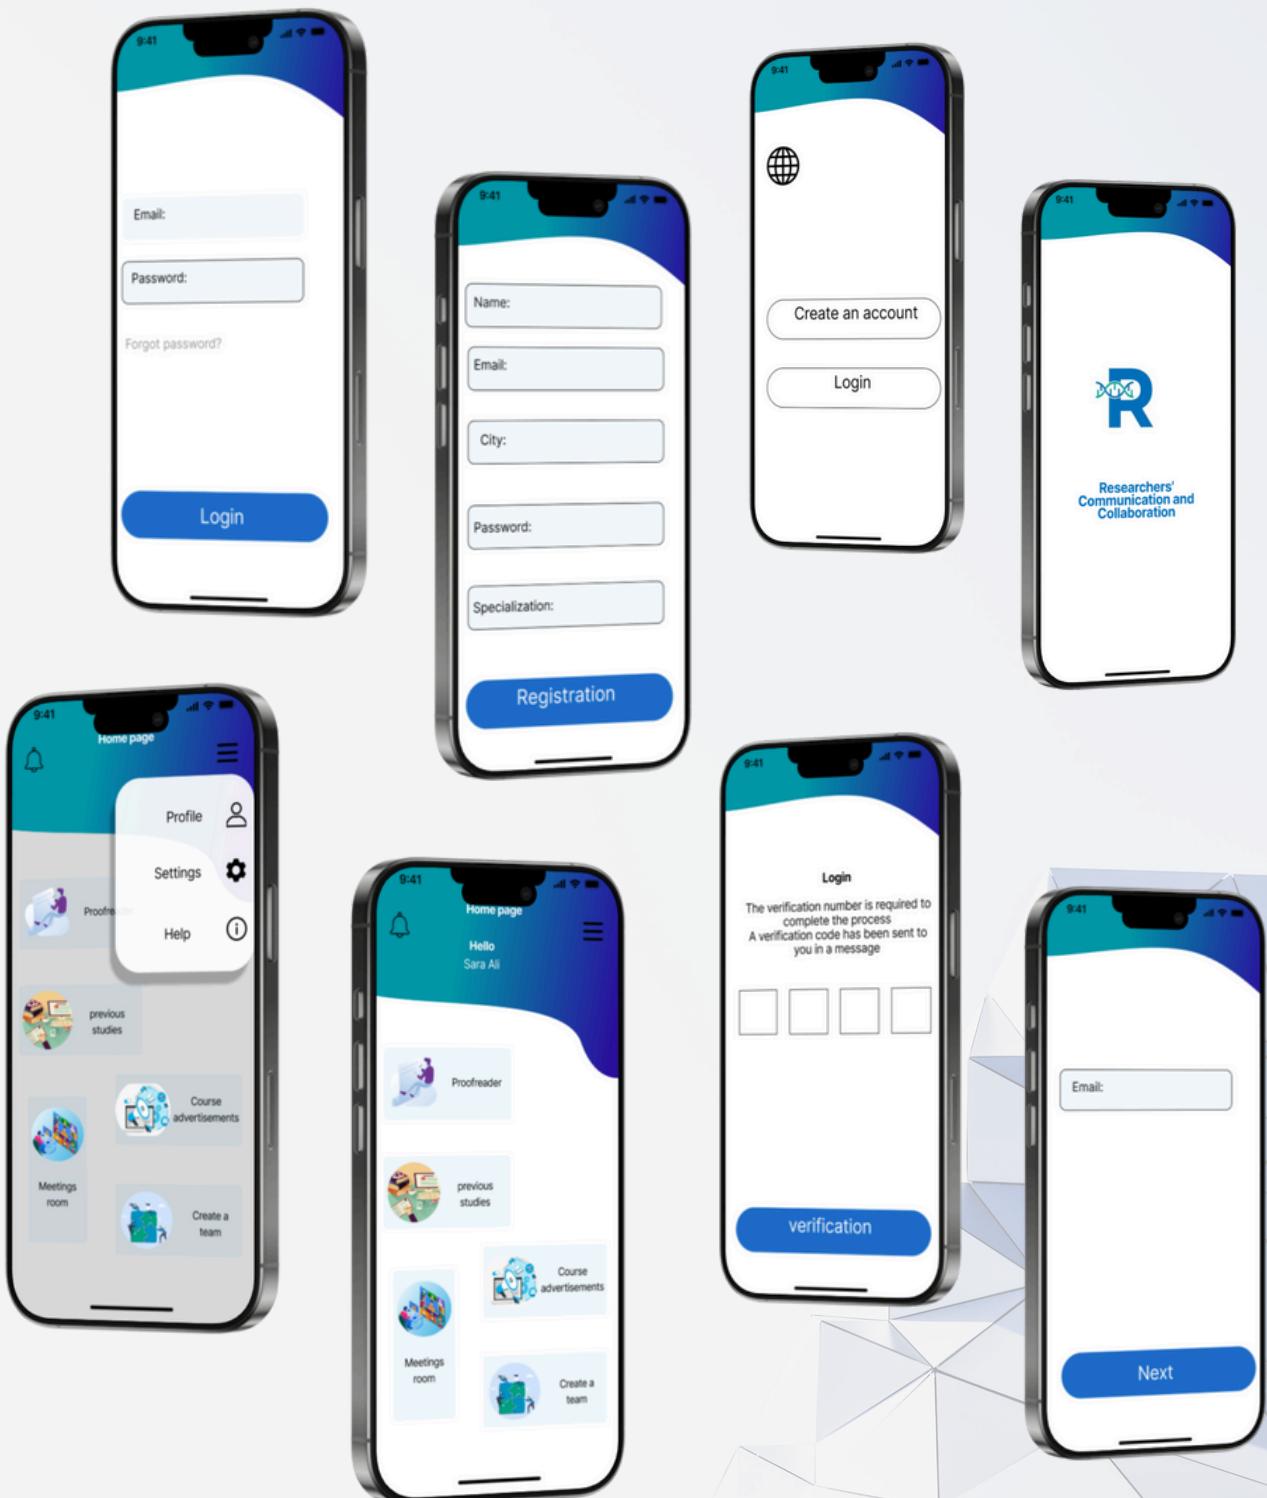

2- Employee Login System:

Developed a secure login system for employees

Projects:

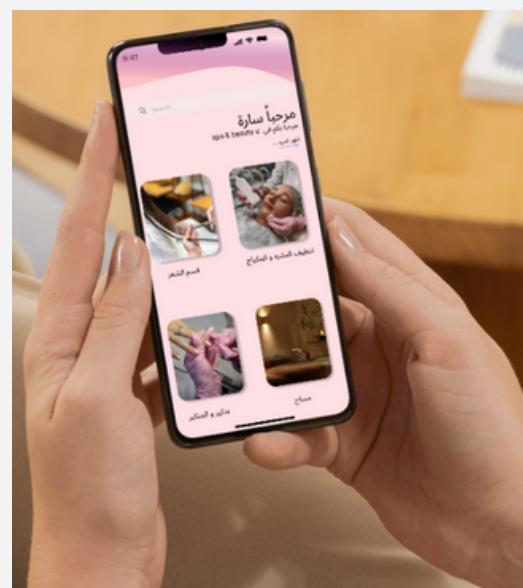

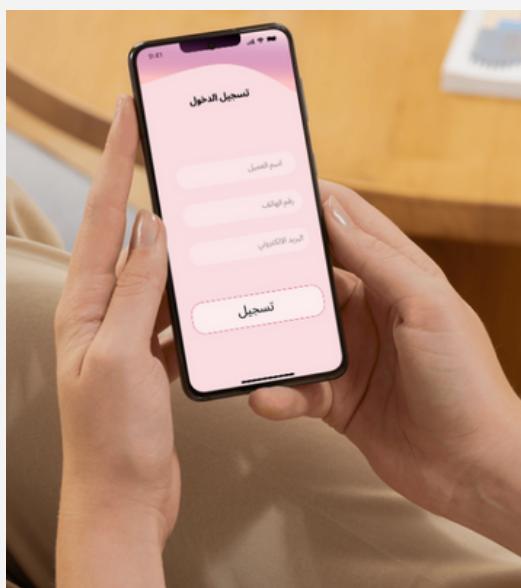

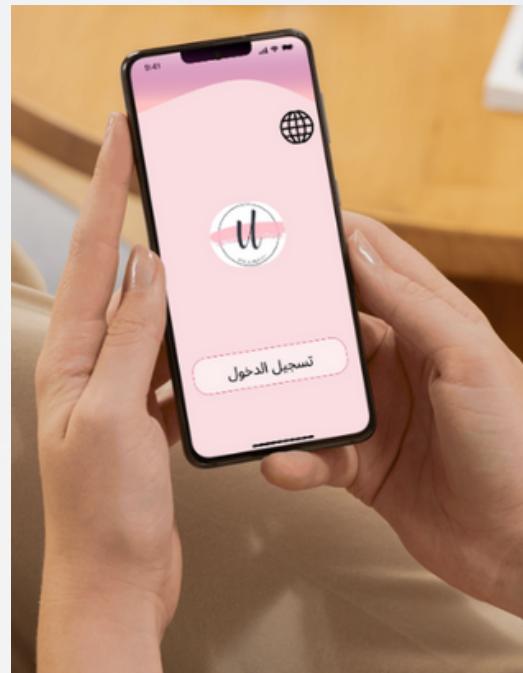

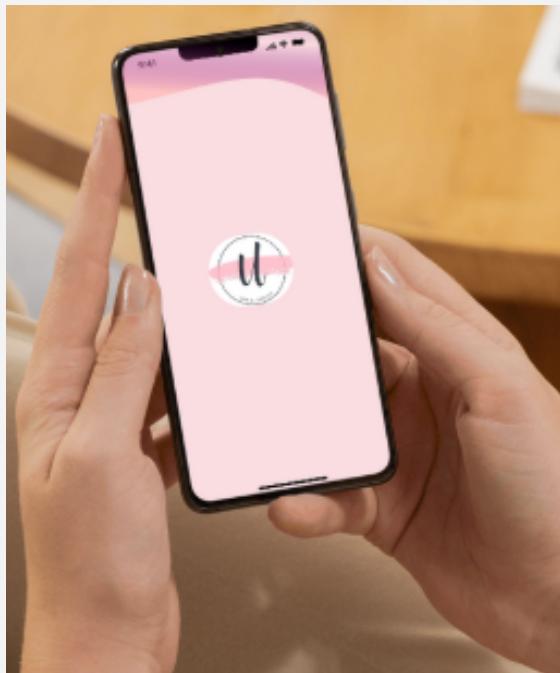

3-Researchers' communications Collaboration:
designing interfaces and programming an application for scientific researchers and communicating with each other, and they can choose a linguistic auditor to review the research before publishing it.

Projects:

Salon Appointment Booking App UI Design:

These interfaces are designed to provide a smooth and convenient experience for users when booking their salon appointments. The design focuses on clarity and simplicity while incorporating aesthetic elements that enhance the user experience.
